

CHILD ASSENT TO ACT AS A RESEARCH SUBJECT - UCSD FLUOROQUINOLONE EFFECTS STUDY

This form is for kids aged 7-12 to learn more about the study and show their willingness to participate. If you are a child aged 7-12, please have someone read this paper (or read it yourself). Fill in the bottom part to show that you want to participate in the study.

Purpose of this study:

Dr. Beatrice A Golomb and her research team are doing a research study to find out more about side effects of particular antibiotics called “fluoroquinolones.” You are being asked if you want to be in this study because you have taken one of these antibiotics and experienced side effects.

If you decide you want to be in this research study, this is what will happen to you:

You will work with your parents to fill out some surveys regarding your experience taking these antibiotics. Each survey may take up to 40-90 minutes to complete. There are up to 3 surveys for those who had side effects like you.

Sometimes kids don't feel good about some things while being in this study. You might feel these things:

- Get bored or bothered about the survey questions
- Feel embarrassed having to tell about what happened to you

If you feel any of these things, or other things, be sure to tell your mom or dad. You can take breaks during the survey. Once you start a survey you have up to 1 month to finish it.

You don't have to be in this research study if you don't want to. Nobody will be mad at you if you say no. Even if you say yes now and change your mind after you start doing this study, you can stop and no one will be mad.

Be sure to ask Dr. Golomb or her research team to tell you more about anything you don't understand.

Please mark a box below if you are interested in participating.

Yes, you will be in this research study.

No, you don't want to do this.
