

Seeking past users of antibiotics:

- Levaquin (levofloxacin)
- Cipro or Ciprodex (ciprofloxacin)
- Avelox or Vigamox (moxifloxacin)
- Zymar (gatifloxacin)

or others in the fluoroquinolone class

**Take part in a research study to understand
the risks and benefits associated with antibiotics**

We are inviting past users of these antibiotics to participate in a survey-based study hosted by Dr. Beatrice Golomb at the University of California, San Diego. This voluntary study aims to better understand: the character, nature, duration, and risk factors for side effects and drug interactions for these commonly used medications. Users of all ages who are fluent in English are desired. Being a participant is easy, simply sign up online and take one or more surveys.
